On behalf of the many researchers in this field,
thank you very much in advance for your support.

A new foundation supporting research into all aspects of medicinal plants and natural products has been created by the Society for Medicinal Plant and Natural Product Research (GA) and is asking for your support.

Medicinal and natural product research is thriving all over the world. There is a considerable interest in this field of research especially from younger scientists. This is also an area of tremendous interest for the general public with new products offering opportunities for farmers, producers and retailers. However, there is a consistent and deepening lack of public funding particularly for projects which are at an early stage of development.

Our key goal is to support highly innovative and multidisciplinary research projects which will strengthen the academic basis of medicinal plant and natural product research and to nurture emerging research networks.

Specifically the Foundation will:

- * Initiate scientific collaboration and the development of research networks
- * Provide start-up funding for innovative projects
- * Provide start-up funding for best in class junior research groups and their leaders.

The funds will initially be used for travel and equipment facilitating proof-of-concept projects. Your donation will help to foster innovation and research in the fields of medicinal plant and natural product research and you will benefit from tax concessions (depending on your tax status and the regulations in your country of residence).
